---

Executive Management, Strategic Leadership, Brand Development,  
Innovation, Technology Product Development, Digital Transformation

## Summary

I started my career in the software industry as a programmer, architect, and consultant. A decade ago, I began the journey of growing my skills in the areas of people management, organizational leadership and transformation, strategic planning and execution, brand building, board engagement, and understanding the true value of servant leadership.

Today, my experiences have equipped me with a team-oriented management philosophy and strategic management experience at various levels and in numerous settings. My goal is to invest my skills and history in the digital world as well as my management background in both the software and international nonprofit sectors to provide senior executive leadership to an organization with a mission I can embrace, a culture I can influence, an executive team I can pour into, and a vision I can help guide.

## Education

Bachelor's in Computer Science, Messiah College, Grantham, PA (2000)

Master of Arts in Religion, Evangelical Theological Seminary, Myerstown, PA (2015)

## Experience

- Corporate strategic planning and execution with sustainable results
- Multi-million dollar budget management
- A history of achieving improbable results under radical resource constraints
- Corporate culture leadership, embracing and setting pace for core values
- Management of departments across distributed offices, time zones, and continents
- Brand development and messaging
- Mass-marketing and multi-million fundraising, including proposal creation and presentation
- A commitment to thoughtful innovation as the lifeblood of any vibrant organization
- Personnel management, including restructuring organizational reporting relationships
- A history of providing direction and oversight outside of my academic disciplines
- Talent identification, recruitment, and onboarding
- Strong presentation, public speaking, and written communication skills
- Teaching skills, authoring and presenting compelling content
- Team leadership, mentoring staff and subordinates, managing up, and coaching peers
- A track record of creating, influencing and owning a vision for an organization
- Cultivating a teachable spirit and a commitment to lifelong learning
- Vendor and consulting selection and management across a number of disciplines
- Significant consulting, customer facing, and relationship management experience
- Outsourced workforce management experience: offshore and remote
- Volunteer recruitment and management, including product and marketing direction to a successful open source software project

# Employment History

## CURE International / PA and International / October 2009 to Present

- Served as technical liaison and interim managing engineer for multiple organizations seeking to build development teams, conducting training, recruitment, and technical specification assistance
- Analysis of company models, performing architecture, requirements, design and implementation services
- Architected the content management tools for (at the time) the 8th most trafficked property on the Internet, comcast.net

## CommNav, Inc / Pennsylvania / July 2000 to April 2003

### Lead Architect – July 2000 to April 2003

- Responsible for approving designs and documentation, overseeing and mentoring junior developers, and managing testing for all next-generation product development efforts
- Architected, designed, and led development of the CommNav portal infrastructure and related business productivity applications
- Primary author of the development API's and system documentation

## Personal

Since 2007, I've been married to my best friend, Cre Carbonaro-Worrall. We have two two girls, Eliana (est. 2011) and Adalie (est. 2012). The three of them amount to my favorite people I've ever had the privilege of knowing. I'm the first of six children to a small-town country pastor and his wife and a 2nd generation American whose family came from England in the late 40's. I've spent my life learning what it means to be a friend, and I've spent most of my career trying to be the kind of supervisor and leader for whom I'd want to work. Because of both upbringing and experience, I consider it an imperative that I invest my time, talent, and treasure in work that matters for far more than financial gain.

## Interests

International travel, information technology in the developing world, the Ancient Near East, Biblical studies, academic writing, teaching, U2, the Cleveland Browns, offline first design, modern technology business models, introducing children (especially females and underrepresented demographics) to programming and science concepts, digital transformation in healthcare
